-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 11 July 2003.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-54 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-54 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)

DETAILED ACTION

1. This Office action is in response to Application No. 10/617,193, filed on 7/11/2003.
2. Claims 1-54 are pending.

Claim Rejections - 35 USC § 102

3. (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
4. Claims 1-54 are rejected under 35 U.S.C. 102 (e) as being anticipated by Horiike (U.S. Pat. No. 6,744,905).

As per claims 1, 2, 3, 5-54 Horiike discloses an image processing apparatus that has an input unit for inputting a plurality set of drawing data representing one frame image a generating unit for generating first intermediate language data representing a watermark to be added to the one frame image and generating second intermediate language data by analyzing the drawing data input from the input unit and a producing unit for producing final print image data, comprising:

A background process device configured to process a background of an original image (see., abstract, col 1, lines 44-67, col 2, lines 15-33, please note background process device is readable as the producing unit of Horiike since his producing unit is for producing final print image data);

Art Unit: 3621

A watermark embedding device configured to embed electronic watermark information into the original image after having been processed by the background process device (see., abstract, figs 1 and 5, col 1, lines 44-67, col 2, lines 15-33, col 3, lines 22-67, col 4, lines 44-67).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 4 is rejected under 35 U.S.C 103 (a) as being unpatentable over Horiike in view of Hamada (U.S. Pat. No. 6,631,239).

As per claim 4, Horiike discloses the claimed limitations as stated in claim 1 above.

Horiike fails to explicitly disclose wherein said background process device processes a plurality of color components. However, Hamada discloses an image processing apparatus where a user utilizes an image editing software on the side of a host computer to perform a necessary working to the image data intended to be printed. For example, by utilizing the software, the user performs change of color or color components (see., abstract, col 1, lines 25-40, col 5, lines 18-30). Therefore, it would have been obvious to a person of ordinary skill in the art at the time the invention was made to modify the teaching of Horiike by including the limitation detailed above as taught by Hamada because this would allow image data to be presented in different color.

Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Pierre E. Elisca whose telephone number is 703 305-3987. The examiner can normally be reached on 6:30 to 5:00.
